

DIUIKIE ENDOCARDITIS

modified CRITERIA

Bacteremia

FEVER $>38^{\circ}\text{C}$
ASTHENIA
HYPOREXIA
Weight loss
(constitutional symptoms)

positive cultures

Typical endocarditis bacteria

Non typical endocarditis bacteria (suggestive)

evidence of endocardial involvement (trans-esoph. US)

Vegetations
Microthrombi
New valve regurg.
or other new valv. related issues.

Prosthetic valve

Predisposing factor.

Augusto 20/8
The Plague Doctor

embolic phenomena

Renal

Abscess
Infarction

Splenic

Abscess
Infarction

Auto antibodies

RF
 \downarrow C3 C4
Hemolytic anemia
Vasculitis
PURPURA

autoimmune phenomena

Septic

Janeway l.
Roth l.
Osler nodules

vascular phenomena.
